

ARUSH K. MANCHANA

Production Engineer with a background of Materials Engineering,

University of Moratuwa

Mobile Phone: (+94) (0)713917040

Email: manchana.arush@gmail.com

Address: Gampaha, Sri Lanka

LinkedIn: <https://www.linkedin.com/in/manchana-arush>

Profile

I am an enthusiastic engineering professional, with specialized knowledge of Materials Science and Engineering. Being an inquisitive person that I am leads to welcome new knowledge through deep work and self-studies, and I am passionate in innovations. With the experience gained through working as a production engineer, I am currently seeking a challenging career opportunity to use proven skills towards achieving strategic organizational objectives while reaching my fullest potential.

Employment

Assistant Manager – Quality Assurance

(10/11/2025 – Current |

| Plastipak Lanka (private) limited – (Pope packaging), Seeduwa

- Oversee implementation, maintenance, and continuous improvement of the Quality Management System (QMS)
- Monitor production processes and quality performance indicators to ensure consistent product quality
- Conduct internal audits and coordinate external customer, certification, and regulatory audits.
- Collaborate with Production, Engineering, Procurement, and Supply Chain teams to resolve quality-related concerns and improve process capability.
- Develop and review quality procedures, work instructions, inspection plans, and standard operating procedures (SOPs).
- Support new product development, raw material qualification, supplier evaluation, and process validation activities.
- Prepare and present quality performance reports to senior management, supporting continuous improvement initiatives.
- Successfully led ISO audit certification/recertification with zero major non-conformities.
- Implemented supplier quality controls resulting in improved incoming material quality and reduced rejections.

Production Engineer - Planning

| Electrozen Global (Private) Ltd, Piliyandala

(01/07/2021–31/10/2025 |

(A subsidiary company of David Pieris Group of Companies)

- Production planning according to the sales forecast and arrange on time deliveries
- Materials sourcing and avoid excess stock and maintaining minimum required stock
- Build trustworthy relationships with suppliers as well as customers make negotiations with them
- Manpower management and monitor and align to the planned budget
- Monitoring production overhead and minimizing the expenses
- Inventory controlling, stock verification, conduct by scheduling periodical auditing
- Identify the fast-moving items and slow-moving items and then identify the market trends
- Preparing process documents, SOPs, work instructions, guidelines for specified products
- Product developments with customer expectations and requirements
- Guiding team members to company goals and required KPIs
- Managing required licenses and renewals on time

Production Engineer

| Nevorp Corporation (Private) Ltd, Kottawa

(01/01/2021–30/06/2021)|

Temporary Instructor

| University of Moratuwa, Katubedda, Sri Lanka

(24/08/2020–30/12/2020)|

Apprentice

| GPV Lanka (Private) Ltd, Daluwakotuwa

(25/06/2018–14/12/2018)|

Education

Honors Degree of Bachelor of the Science of Engineering

Field of Specialization: Materials Science & Engineering (Focused area in electronics materials)

Academic Standing: Overall GPA of 3.01/4.2 with a Second Class Lower Division

| University of Moratuwa, Sri Lanka

(2015-2020)|

Diploma in Psychological Counselling

| Damrivi Foundation

(2025-current(|

G.C.E (A/L) Examination

2A's & B, Z-Score – 2.05

| D.S. Senanayake College, Colombo 07

(2014)|

Professional Skills

Organizational, Managerial skills:

- Overall experience on production planning, quality assurance, SOP preparation and New Product Implementation.
- People Management skills gained through production handling, development and training operators and setting KPIs for individuals and teams
- Active participation in practicing management systems; **ISO 9001, ISO 14 001, ISO 45,001**
- Familiar with ERP systems

Leadership skills:

- Leadership skills developed through training and developing operators and setting examples for them for a better working environment.
- A volunteer of 'Hasaralla' annual charity project which renovates the buildings of the school and equipped with modern computers and accessories in the rural area of the country
- Department Coordinator and Demonstrator : EXMO 2017
- Organizer of the Astronomy and Space Science Association (2014)
- Member of the school Cricket, Football, Basketball, and Chess team (2011)

Soft skills:

- Sound verbal and written communication skills in English improved through interaction with customers and international suppliers and excellent communication skills in Sinhala.
 - Excellent problem-solving skills, analytical skills, report writing skills and presentation skills
 - Excellent computer literacy (MS Office, 3D modeling, QB, Video editing, etc.)
 - Dynamic team player with excellent interpersonal skills
-

Academic Skills

Technical Skills:

Controlled Systems and Instrumentation, Nanotechnology, Electronics and Optical Device engineering, Advanced Ceramics, Smart Materials, Magnetism and Magnetic Materials, Metal Forming and Machining, Heat Treatments and Strengthening Mechanisms of Metals, Construction Materials, Paint Technology, Polymer Science and Engineering,

Research and Development (related to solar cells), Ability to operate MS office packages, Analytical software (Minitab), Auto CAD, Solid Works and Programming (Arduino, VB, Python, C++)

● Achievements:

- Runners up of 'MathQuiz' competition organized by University of Colombo (2013)
- Bronze medal from Astronomy Olympiad Sri Lanka (2013)

Management Skills:

Cleaner Production, Total Quality Management, Technology Management and Professional Ethics, Business economics and financial accounting, Human Resource Management

Technical Project Experiences

Projects at Electrozen Global (Private) Ltd

- Setting up the TV assembly plant
- Circuit design for a new three-wheel taillight (PCB printing, Assembling and Testing)

Projects at Nevorp Corporation (Private) Ltd

- Developing a semi-automated cap inserting machine for junction boxes
- Circuit design for a new battery powered radio and exterior design support

Projects at Department of Materials Science and Engineering

- Research and development of Perovskite structured materials for solar cells
 - This is the latest most efficient experimental solar cell type in the world, which replaces the toxic metals (Lead-Pb) with the atomic structure under the friendly environment.
- Fully calculated 3D Go-Kart model designed using SolidWorks (software) to motorist formula race tournaments.
- Developing a portable machine to detect cracks in metals using magnetism principles and Arduino Programming.
- Industrial Projects
 - Newly-made and introduced to the company of 'North Sails' at BOI zone in Biyagama, a quantitative porosity identifier for carbon fiber yacht by using ultrasonic waves and Matlab software.
 - Found a new effective and low-cost materials for the item of Mosquito Repellent Liquid Vaporizer for the company of Siddhalepa at Rathmalana (<https://siddhalepa.com>).

Projects at GPV Lanka (Private) Ltd

- The protocol was implemented to show the company how to recycle 90% of pure solder (Sn) for their waste management system.
 - Experimentally proved the root causes and narrowed down the occurring bubbles in the potted resins and introduced the proper remedies against the moisture of the environment.
 - Minor and major corrections of the existing VB programs and excel Macro Codes have been done to track each and every item back if there was a functional error in the item.
 - Introduced, modern modification and how to handle the tools and mechanical equipment to improve the line efficiency, concerning the time factor.
-
